Subject: SIEF [203-457-6] 3-chloropropene: SIEF agreement

Dear SIEF members,

as recently announced, the SIEF agreement for 3-chloropropene (allyl chloride) is now available on REACHCentrum's website at <http://www.reachcentrum.eu/EN/consortium-management/consortia-under-reach/allylics-reach-consortium.aspx>.

If you wish to register this substance please take some time to read and sign the SIEF agreement. The instructions on how to do it as well as an overview of the complete sequence of steps and the corresponding timeline can be found in the attached "game plan".

Please note that only those SIEF members that sign the agreement will be allowed access to the registration dossier that the Allylics REACH Consortium is about to complete, as this is the only way to ensure a transparent and fair cost sharing mechanism.

Regards,
Pedro Moura Pinto
