

ReachCentrum opens operation in Asia

ReachCentrum is delighted to announce the opening of a new office and subsidiary in Seoul: ReachCentrum Asia. Through this new office, ReachCentrum will be able to support companies and consortia meeting their obligations related to REACH-like regulations emerging in Asia in a similar way to how we have performed in Europe for the last 13 years.

Services will include:

- Consortium Management and Lead and co-registrant support
- Letters of Access (LoA) Shop
- Financial Management
- Contract Management and Data Access
- Trustee Service and Regulatory Advisory Service
- Data Brokerage Platform

Since its establishment in 2006 ReachCentrum has helped companies all through the value chain prepare and implement EU REACH and Biocide. ReachCentrum is the European market leader for consortia management services and trading of Letters of Access. During the last 4 years, following the acquisition by ERM, ReachCentrum has further diversified its activities, developing Chemical Data Brokerage activities.

How do we partner with clients

ReachCentrum partners with clients to accompany them with the REACH process, in addition to Global Regulations outside Europe.

Chemical registration

ReachCentrum offers expert consultancy to support Global Chemical implementation within companies and stakeholder groups, assisting customers with effective strategies to fulfil requirements. Project management, SIEF communication, finance and data management, legal support, letter of access management, dossier update, evaluation and authorisation support.

Financial Management & LoA e-shop

ReachCentrum Financial Management Service takes care of all aspects of the financial management for projects, including complex calculations in consortia with many members and multiple substances. ReachCentrum manages the Letter of Access e-shop, a globally-recognized platform allowing companies to purchase access to the joint submission of registration dossiers under REACH in a fully automatic way.

Legal Management

ReachCentrum provides expertise and resources to tackle all legal aspects of chemical global regulations. ReachCentrum legal experts provide tailored legal services adapted to the particular needs of your company, or group of companies, including consortia.

Global Regulations & Data Brokerage

ReachCentrum actively supports data owners to provide access to data for use in compliance in chemical regulation globally. Secured IT-systems, including our Data Brokerage Platform, and processes are in place to support joint registration, access and purchasing data, data sharing and cost sharing for a successful dossier registration.

About Us

ReachCentrum was established in 2006 to help companies fulfil their EU-REACH (Registration, Evaluation, Authorisation and restriction of Chemicals) Regulation requirements through their value chain. It was acquired by ERM in May 2015 and forms a core part of the product stewardship offering from ERM. ReachCentrum supports clients in relation to chemical regulations including EU-REACH, classification, labelling and packaging of substances and mixtures (CLP) and Biocidal Products Regulation (BPR). Together, ReachCentrum and ERM provide global support to Clients for product compliance with respect to K-REACH and other global REACH-like legislations. In 2019 ReachCentrum opened a regional operation in Seoul, South Korea, to meet customer needs across the whole APAC region.
